

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

Number 107 of the Publications of the Astronomical Society of the Pacific was completely printed and ready to mail on April 17, 1906, but, with the exception of one advance copy sent to the Secretary-Treasurer, the entire edition was destroyed in the great San Francisco fire of April 18-20. This fact and the heavy demands made upon printing offices in California since the fire will explain the delay in the appearance of the present number which is as nearly as possible a facsimile of the one destroyed. Number 108 will also be delayed, but it is hoped that subsequent issues will appear on time.

The address of the Secretary-Treasurer, Mr. F. R. ZIEL, is 806 Franklin street, San Francisco, Cal.

**THE COMMITTEE ON PUBLICATION.**
